Park the vehicle on level ground-if the vehicle isn't level, the oil level can be incorrect when you check it. Turn your engine off, and wait 10 min so all of the engine's oil drains into the oil pan.

Roll up or remove loose clothing, and keep your arms away from the cooling fan when checking the oil-fans can turn on automatically, even when the engine is off

Open the hood and find the oil dipstick. It's near the engine and usually has a brightly colored handle. Find the oil fill location-it may have an oil can icon on it. Remove the fill cap and place the small end of the funnel into the fill hole.

Remove the funnel and replace the dipstick and oil fill cap. Make sure both are fully secured in place, then close the hood.
