Using A Double Number Line To Solve A Percentage Problem

A double number line is a way to view a proportional amount of two different quantities.

Mark where 20 out of 100 or 20% would be located on the number line.

Draw marks on the first number line directly above the marks of the bottom number line.

20% of 75 is equal to 15.

A double number line is graphical way to show that the part as compared to a whole of two different quantities have equal rates. 2 rates that are equal to each other are proportional.
